In Table I and the caption of Fig. 8 of Ref. 1, the numerical value of the percolation threshold η_c of three-dimensional overlapping spheres as determined via the rescaled-particle method was given as 0.34289(2). The correct value should be $\eta_c = 0.34189(2)$. We note that this typographical error does not affect any of the results, conclusions or figures in the paper.
